

GLOBAL VERSUS LOCAL CHANGES IN UPWELLING SYSTEMS

Durand Marie H  l  ne, Roy Mendelssohn, Philippe Cury, Claude Roy and Daniel Pauly
 ORSTOM (editor)
 Paris
 France

Contents

1. Preface: CEOS: the Climate and Eastern Ocean Systems Project

*Philippe Cury, Andrew Bakun, Marie-H  l  ne Durand,
 Roy Mendelssohn, Daniel Pauly and Claude Roy*

2. The CEOS Comparative Analysis Framework: Motivations and Perceived Opportunities

Andrew Bakun

Part 1-Global and local environmental changes

3. The development and the use of a climatic database for CEOS using the COADS dataset.

Claude Roy and Roy Mendelssohn.

4. Change in oceanographic time series: how to detect it on both global and local scales

Marie H  l  ne Durand and Roy Mendelssohn

5. Long-term Variability in the Seasonality of Eastern Boundary Current (EBC) Systems: An Example of Increased Upwelling from the California Current

Franklin B. Schwing and Roy Mendelssohn

6. Recent trends in the spatial structure of wind forcing and SST in the California current system.

Franklin Schwing, Richard Parrish, and Roy Mendelssohn

7. Freshwater yields to the Atlantic Ocean : local and regional variations from Senegal to Angola.

Gil Mahe

8. Spatial dynamics of the coastal upwelling off C  te d'Ivoire.

Angora Aman and Siaka Fofana:

9. Spatial and temporal dynamic of the upwelling off Senegal and Mauritania: local change and trend

Herv   Demarcq

10. Variability and trends in some environmental time series along the Ivoirian and the Ghanaian coasts

Kwame A. Koranteng and Olivier Pezennec

11. Note on trends and variability of the environmental time series along the Senegalese coast

Itaf Deme-Gningue

Part 2-Pelagic fish and environmental changes

12. Food, transport and anchovy recruitment in the southern Benguela upwelling system of South Africa

Alan.J. Boyd., L.J. Shannon, Fritz.H. Shulein, and John Taunton-Clark

13. Sardine and other pelagic fisheries changes associated with multi-year trade wind increases in the southern Canary current (26  N-14  N) between 1964 - 1993.

*Denis Binet, Birane Samb, Mahfoud Taleb Sidi , Jean-Jacques Levenez
 and Jacques Servain*

14. Climate dependent fluctuations of the Moroccan sardine and their impact on fisheries
Souad Kifani
15. Marine environmental conditions and fishery productivity in the Black Sea
Georgi Daskalov and Kamen Prodanov
16. The recruitment of the Chilean sardine (*Sardinops sagax*) and the "optimal environmental window"
Rodolfo Serra, Philippe Cury and Claude Roy
17. Pelagic fish stocks and environmental changes in the South-East Pacific
Eleuterio Yáñez, Miguel García and Maria-Angela Barbieri
18. *Sardinella aurita* population dynamics related to environmental parameters in the southern Caribbean (Venezuela)
Jeremy Mendoza, Pierre Fréon , Ramón Guzmán and Rubén Aparicio
19. Global combined with local changes : the case of the French Guyana penaeid stocks
Christophe Béné and Philippe Moguedet
20. Changes in the dynamics and biology of small pelagic fisheries off Côte d'Ivoire and Ghana : the ecological puzzle
Olivier Pezennec and Kwame A. Koranteng
21. Whiting (*Merlangius merlangus euxinus*) in the western Black Sea and stock assessment of sprat (*Sprattus sprattus* L.) and bulgarian coast in relation to some natural and anthropogenic factors
Kamen B. Prodanov, Georgi M. Daskalov, Konstantin Mikhailov, Konstantin Maxim, Emin Ozdamar, Vladislav Shljakhov, Alexandr Chashchin and Alexandr Arkhipov
22. Variability of fish catches in different ecosystems
Konstantinos I. Stergiou
23. Searching desperately for natural Eutrophication: the case of the NE Mediterranean
Konstantinos I. Stergiou and E. D. Christou
24. Pelagic fisheries and environmental constraints in upwelling areas : How much is possible ?
Valérie Faure and Philippe Cury
25. Clupeoids temporal reproductive strategies in upwelling areas: a tentative generalization.
Yunne-Jai Shin, Claude Roy and Philippe Cury
26. Comparative modelling of trophic flows in four large upwelling ecosystems: global vs. local effects
Astrid Jarre-Teichmann and Villy Christensen

Part 3-Human activities facing short and long term changes

27. Comparative study of the dynamics of small-scale marine fisheries in Senegal and Ghana
Jocelyne Ferraris, Kwame A. Koranteng and Alassane Samba
28. Fishmeal price behaviour: global dynamics and short-term changes
Marie-Hélène Durand
29. Modeling fishery activity facing change: Application to the Senegalese artisanal exploitation system
Jean Le Fur

30. Dome or U-Shaped Physiological Responses of Populations, and Ecosystems

Gary D. Sharp

31. Life history strategies for marine fishes in the late Holocene

Richard H Parrish

32. Fisheries as diminishing assets

Philippe Cury and Orlane Anneville

33. Concluding remarks

Marie-Hélène Durand, Philippe Cury and Daniel Pauly
